

**Green light for Burnett Heads' RV Village**

Bundaberg Regional Council has unanimously voted in favour of the construction of a \$30 million RV residential village at Burnett Heads.

RV Lifestyle Village CEO, Phillip Stewart, said that the development project will include 363 homes and 62 duplexes - all featuring RV friendly garages, expansive parklands and 5-star recreational facilities including a lagoon pool, cinema, games room and a covered bowling green.

Developers, RV Lifestyle Village Oceanside Pty Ltd, are a small, family owned business with long ties to the area.

"We're delighted that Bundaberg Regional Council supports our vision and recognises the positive impact RV Lifestyle Village will have on the local Burnett Heads community," Mr Stewart said.

"With its ideal climate, coastal location and proximity to Bundaberg's major services, Burnett Heads was the perfect choice for the project. We are committed to creating a residential community that will appeal to locals and attract new residents to Burnett Heads," Mr Stewart said.

"We are working with a number of local businesses in Bundaberg in our planning, and we foresee that the development will create substantial construction and operational jobs, which would be a significant boost to local and regional businesses."

"The development, which will cater to the over 50s market, will cover a 40-hectare site on Burnett Heads Road," he said.

Mr Stewart stated that the Village will have a strong focus on sustainability and livability, with each home offering substantial energy efficient features as standard.

Being in close proximity to the coast, the developers are committed to reducing potential light pollution from the development.

"We consulted with the Sea Turtle Alliance in the early stages of our planning to ensure we have the appropriate measures in place such as motion-sensor lights and timers on street lighting, substantial plantings to create light barriers and low-wattage lighting, to make the village low glow," Mr Stewart said.
